

On April 29, 2014, Integrated Security Corporation was awarded U.S. Patent 8710983 **for the Hydra Intelligent Sensor Network**

. ISC Engineering Manager, Bernard Malkowski spearheaded the design of the Hydra system. The innovative engineering of the system allows mainstream security customers access to highly reliable and affordable perimeter and outdoor asset protection. Hydra's breakthrough design offers:

- Two independent sensing technologies in each sensor
- Improved detection of intruders
- False alarms to near zero
- Wireless Mesh Network
- Easy and low-cost installation compared to other systems
